

Web Based University Student Registration and Examination Grading System

R. Ponnampalam and G. S. Makalanda

Uva Wellassa University, Sri Lanka

Web based university student registration and examination grading system is designed to facilitate lecturers and students interactions through web in addition to the meetings at the regular lectures. It has almost all the features that a student or lecturers will need to communicate regarding the course, grading and submission etc. There is different level of users and depending upon the level they have access to different pages and functionalities. The web pages are built using php and used with MySQL database for database development. Object oriented analysis techniques were used to analyze and model the system, the system is available only for the registered users. To use the system, the students and lecturers should have the access to computers, the Internet and should possess basic knowledge of workings of a Web Application.

Key words: - Database, Web application, Registration
